HSE Policy

In the field of environmental safety:

- ✓ To minimize the factors influencing environmental contamination;
- ✓ Efficient use of natural resources;
- ✓ To carry out educational actions for the purpose of increasing professional level of the workers connected with preservation of the environment;
- ✓ To familiarize all workers with conditions of environmental safety management system and assure appropriate realization and improvement of application of these conditions in order to prioritize the concept of "environmental safety" in all fields and comply to the corresponding legislation in the field of preservation of the environment.

In the field of health and safety of labor:

- ✓ To define factors which can affect health and safety of our clients, workers and other involved persons at realization of highway and railway construction projects, and take measures on their prevention, as well as provide safe working conditions;
- ✓ To carry out educational actions for the purpose of increasing professional level of the workers connected with safety and security of labor;
- ✓ To meet conditions of the legislation in the field of safety and security of labor.
